About Screen

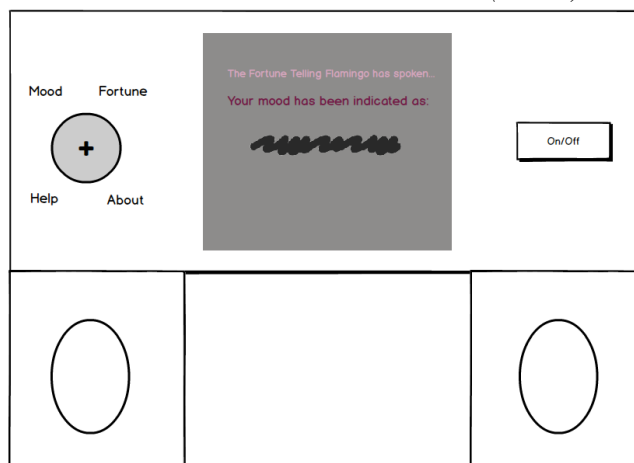

Help Screen

Functional Mode 1 Screen (Fortune)

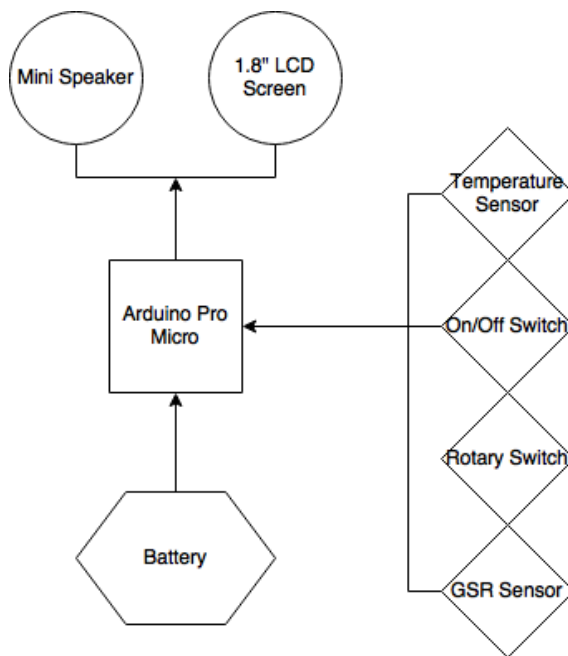

Functional Mode 2 Screen (Mood)

The user will move between screens by way of a rotary switch that physically identifies modes. By moving the switch the user is able to enter the fortune mode, mood mode, about page or the help page. From the home screen, the device takes in the GSR and temperature sensor data to create a fortune/mood and delivers the text on the relevant functional mode screen.

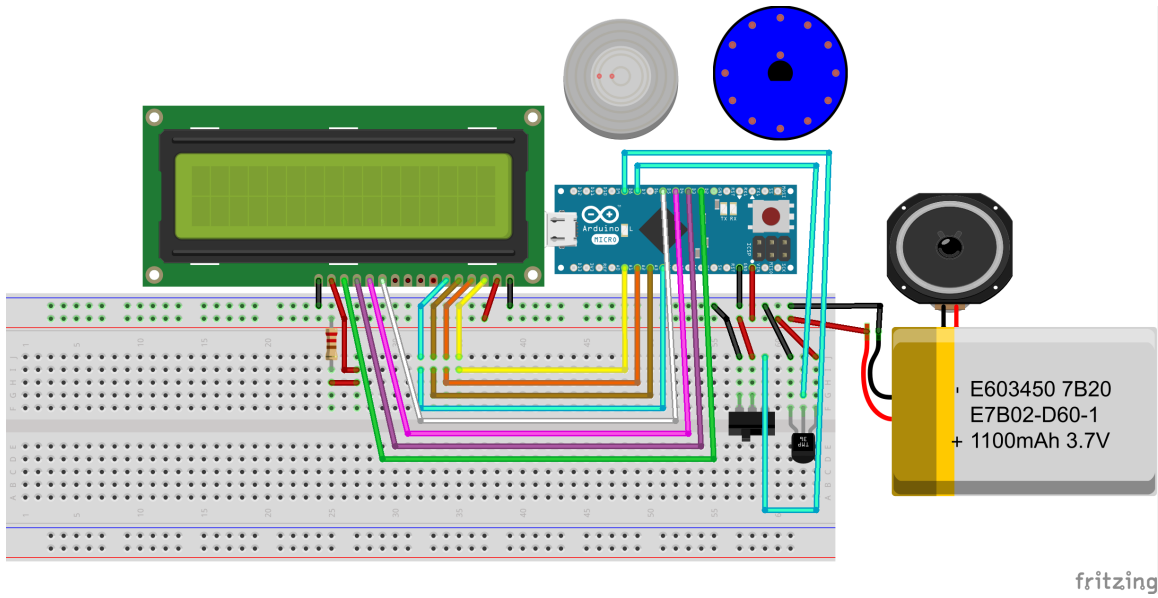

Component Sketch
